

# THE SAFETY/RISK MANAGEMENT ASSESSMENT SUITE

## Improve Employee Focus, Engagement, and Safety

Practically all organizations have some form of safety and risk assessment and management approach, but few have the resources to support their managers comprehensively in the actual process

This suite offers two support systems:

1. Three individual assessments (with Self, 180-degree and 360 degree versions). These are a Safety Effectiveness, Ergonomic Effectiveness and Stress/Pressure Management Effectiveness profile.
2. The S.A.F.E system is a comprehensive, easy to follow, multi-part audit/assessment process that involves all employees in an enterprise (of any type or size) in helping to bring about long-term occupational health and safety improvement. The system has an extensive suite of paper based support materials, which can be purchased in hard copy format. However, widespread access is also provided via this web site. This site contains all of the extensive support documentation and more (running to well over 1,000 pages) as well as providing a world-class on-line OH&S survey process.

The S.A.F.E. system provides a sophisticated but easy to use overall audit framework to help organizations of all kinds to assess their current occupational health and safety performance and use the information gathered to make targeted plans for improvement. For this reason, the S.A.F.E system applies just as much those organizations that are already using an OHS management system (but want to base it on better on-going data gathering techniques) and those (at the other end of the spectrum) that have no OHS systems in place at all.

The five umbrella clusters in the SAFE System are:

Safety Behaviour  
Safety Design

Safety Systems  
Safety Quality

Asset Safety

### WHAT DO YOU GET

Full unlimited access to the SAFE resources web site with 60, 70 or 80% off the normal price where internal Risk/safety staff or line managers can generate as many surveys or individual assessments as they wish.

**KEY DISTINGUISHING FEATURE**  
*The SAFE system has an extensive searchable library of best-practice safety resources including checklist and articles to use as needed*
